

## **Sample APA Format Annotated Bibliography in Alphabetical Order**

**Topic:** Human Activities are the Main Drivers of Climate Change

**Review:** [How to Write an Annotated Bibliography in Alphabetical Order](#)

Johnson, A. (2019). *The Impact of Climate Change on Biodiversity*. Environmental Studies Journal, 15(2), 45-58.

Johnson's article explores the consequences of climate change on global biodiversity, emphasizing the challenges faced by ecosystems and species due to shifting environmental conditions. The author presents a comprehensive overview of the topic, backed by empirical evidence and scholarly research. The article's structured approach enhances understanding and engagement with the subject matter. This source is highly relevant to understanding the intersection of climate change and biodiversity loss, providing valuable insights for policymakers, scientists, and conservationists.

Smith, J., & Brown, K. (2020). *Sustainable Agriculture Practices*. Journal of Agricultural Science, 25(4), 112-125.

Smith and Brown investigate sustainable agriculture practices, focusing on techniques that promote environmental conservation and food security. The article offers practical solutions and innovative approaches to farming, contributing significantly to the discourse on sustainable food production. This source is essential for understanding how agricultural practices can mitigate environmental impacts and contribute to sustainable development goals.

Williams, C. (2021). *Renewable Energy Technologies*. Renewable Energy Review, 8(3), 78-91.

Williams examines various renewable energy technologies such as solar, wind, and hydroelectric power, highlighting their potential in combating climate change and reducing reliance on fossil fuels. The article provides a thorough analysis of renewable energy options, considering their economic viability and environmental benefits. This source is crucial for understanding the role of renewable energy in addressing climate change challenges and transitioning towards a greener energy landscape.

Zhang, L., & Lee, S. (2018). *The Economics of Climate Change Adaptation*. Economic Perspectives, 12(1), 32-45.

Zhang and Lee analyze the economic dimensions of climate change adaptation strategies, assessing the costs and benefits of different adaptation measures. The article offers valuable insights into the economic implications of climate change adaptation, highlighting potential strategies for policymakers and businesses. This source contributes significantly to understanding the economic considerations involved in climate change mitigation and adaptation efforts.
