### Category

### Scored Items

Experts selected these topics as essential components of a strong, thorough interview with this patient.

### Patient Data

#### Not Scored

A combination of open and closed questions will yield better patient data. The following details are facts of the patient's case.

### Chief Complaint

 Asked about asthma

- Reports having asthma
- Reports asthma exacerbations

### Relevant Medical History

 Asked about severity of asthma

- Reports asthma is intermittent

 Asked about asthma frequency and duration

- Reports asthma exacerbations occur up to 2 times a week
- Reports asthma exacerbations last around five minutes

 Asked about most recent asthma exacerbation

- Reports last exacerbation was three days ago
- Reports last exacerbation around cats at cousin's house

 Asked about asthma triggers

- Reports cat allergy as asthma trigger
- Reports dust as asthma trigger
- Denies asthma problems at work
- Denies asthma problems at home

 Asked about asthma management

- Reports inhaler

 Asked about asthma medication

- Reports albuterol inhaler (Proventil)

- Asked about number of puffs when using asthma inhaler
- Reports recommended dose is 1-3 puffs as needed
  - Reports typically taking 2 puffs
  - Reports sometimes needing 3 puffs to control symptoms

- Asked about exacerbation symptoms
- Reports chest tightness during exacerbation
  - Reports wheezing during exacerbation
  - Reports shortness of breath during exacerbation
  - Denies coughing during exacerbation
  - Denies chest pain during exacerbation
  - Denies painful breathing

- Asked about current breathing
- Denies current breathing problems

### Review of Systems

- Asked about cough history
- Reports only coughing when she has a cold
  - Denies coughing up blood

- Asked about sputum
- Denies sputum

### Risk Factors

- Asked about respiratory illness history besides asthma
- Denies history of bronchitis
  - Denies history of pneumonia
  - Denies history of emphysema

- Followed up on asthma diagnosis
- Reports specific age of diagnosis is 2.5 years old

- Asked about seeing an asthma specialist
- Reports not seeing asthma doctor in two years

- Asked about past hospitalizations
- Reports past hospitalizations for asthma
  - Reports five past hospitalizations for asthma
  - Reports most recent hospitalization at age 16
  - Reports hospital treatment was usually steroids and a nebulizer

- Asked about general allergies
- Reports allergy to cats

- Followed up on allergy symptoms
- Reports sneezing, itchy eyes, and wheezing

- Asked about allergy treatment
- Reports avoiding cats when possible
  - Reports using inhaler
  - Reports showering

- Asked about tobacco use
- Denies currently smoking tobacco
